UM3 Series Universal™ Modules

Improve metering accuracy and reduce inventory and maintenance costs.

UM3 Universal modules:

- Improve adhesive add-on precision during intermittent operation
- Reduce maintenance costs with rebuildable modules
- Simplify service with less downtime

UM3 series Universal modules feature a flexible three-way design that maintains accurate hot melt adhesive metering performance. The single-platform modules are compatible with numerous spraying and coating technologies, including Summit™, SureWrap™, Universal, bead and dot applicators. UM3 modules further enhance pattern capabilities by accepting CF®, Summit, SureWrap and Control Coat® nozzles.

Pneumatically-actuated 25-millimeter wide modules maximize metering performance during intermittent operation. Consistent metering throughout the dispensing cycle permits greater adhesive add-on precision and reliable operation in demanding applications. A diverter plate assembly is available to economically convert manifold-mounted solenoids to flange-mounted for high-speed intermittent lines.

UM3 Universal modules include an innovative seal cartridge that significantly simplifies in-house rebuilding to help reduce maintenance costs. The patented single-screw clamp permits quick nozzle replacement, enabling fast changeovers and trouble-free cleaning.
UM3 Universal™ Modules

Specifications

Compatibility with numerous spray and contact or non-contact coating technologies adds production flexibility.

Factory preassembled seal cartridge simplifies rebuilding and provides consistent operation.

UM3 designs are available to dispense downward and at right angles.
