Nordson DAGE, the only x-ray company whose focus is on x-ray electronics inspection, offers the Nordson DAGE XD7600NT Diamond x-ray inspection system, the ultimate choice for the highest magnification x-ray imaging.

The unique Nordson DAGE NT maintenance-free, sealed transmissive type of x-ray tube, providing 0.1 μm feature recognition and up to 10 W of target power, together with the 2 Mpixel XiDAT3 digital image detector makes this jewel of a system the choice for the highest performance and highest magnification imaging tasks.

The vertical system configuration, with the x-ray tube sitting below the isocentric ‘move and tilt’ of the detector, all controlled through the simple, joystick-free, ‘point and click’ operation of the Nordson DAGE Image Wizard Software provides the safe and collision-free inspection required for production applications. All these tasks can be simply and quickly automated from within the standard Nordson DAGE software without the need for programming skills. Optional upgrades include μCT.
