Nordson EFD’s Series 160AA Quick Spray is a low-pressure air-assisted spray system for two-component coatings.

This disposable static mixer is designed for use with conventional meter/mix equipment or with Nordson EFD’s two-component cartridge system. The reactive coating is mixed within the disposable static mixer. At the mixer outlet, air is introduced which atomizes the liquid stream. The degree of atomization can be adjusted by regulating the airflow rate. Since the reactive coating is contained completely within the mixer, cleanup is minimal.

### Round Spray Pattern

- The round air cap produces a full cone pattern, which is completely filled with spray drops. It is used on irregular surfaces, such as truck bed interiors.
