The 14.3mm High Flow Turbo™ Mixer gets things flowing to enable higher flow rates with less effort. The square geometry consists of a series of alternating left and right hand elements with intermittent flow inverters which effectively channel the fluids from the walls into the center of the mixer. The High Flow Turbo is designed to fit most disposable cartridges.

Features

- Shorter than comparative spiral mixers
- Consistent high quality mixing
- Cost savings from reduced adhesive waste
- Improved service life compared to competitive square mixers
- Snap off extensions

Specification

- Elements: Polypropylene
- Housing: Polypropylene
