Syringes for Equine Applications
Single and multi-dose packaging solutions

Nordson EFD offers a comprehensive selection of dosing syringes used in the treatment of horses and other animals.

Available in single or multi-dose options, EFD disposable animal health syringes are used to package medications, supplements, and a variety of other equine-related creams, gels, and pastes.

For multi-dose use, EFD Dial-A-Dose® syringes offer an innovative, customizable solution to tailor doses based on animal size, treatment schedule, and other requirements. The system’s integrated ring allows users to “dial in” and administer the correct dose, and then securely reseal the syringe until its next use.

EFD’s Posi-Dose® system is designed for oral deworming treatments. Its unique twist-lock ring snaps into position to set the specific dosing volume. And its nozzle-free design ensures positive confirmation that each dose is completely dispensed. Posi-Dose syringes can also be re-sealed for multi-dose use.

Other one-piece and two-piece plungers without the locking mechanism are also available.

Dial-A-Dose and Posi-Dose syringes are molded from FDA-approved resins to safely package veterinary pharmaceuticals, nutritional supplements, and other equine products. Available in 6cc to 100cc volumes, EFD animal health syringes can also be ordered with custom options, including specialized calibration marks, labels, colors, and more.

**Features**
- FDA-approved HDPE and polypropylene syringes
- Range of sizes, colors, and nozzles
- Self-venting barrels with “lead-in” aid for easy fill

**Benefits**
- Dial-A-Dose and Posi-Dose allow veterinarians or owners to dose the horse, cap the syringe, and save for next dose
- Locking ring ensures exact amount is dispensed
- Faster and easier to repeat dose than other syringes
- Different nozzles to easily dispense any material viscosity for oral and topical applications
Syringe Systems for Equine Applications

**EQUINE SYRINGE SYSTEMS**

Syringes include integrated molded nozzle. Order plungers and caps separately. White caps molded in LDPE.

Standard Multi-Dose Plungers
Choose a Dial-A-Dose or Posi-Dose plunger for measured multi-dose use. Sample plunger calibration marks shown below. Custom colors and calibrations available.

- 6cc Posi-Dose plunger
- 15cc Dial-A-Dose plunger
- 30cc Dial-A-Dose plunger
- 60cc Dial-A-Dose plunger
- 80cc Dial-A-Dose plunger
- 100cc Dial-A-Dose plunger

Standard One- and Two-Piece Plungers
Choose a one-piece or two-piece plunger when measured doses aren’t required. One-piece plungers feature integrally-molded seals, while two-piece plungers allow more flexibility for different fluids. Both styles retract easily to eliminate drip and drool, and maximize product use.

- One-piece plunger
- Two-piece plunger
