The 725D Series valve systems consistently dispense a wide range of medium to thick fluids, including greases and silicones.

The piston design provides a slight snuff-back at the end of the dispense cycle for positive fluid cutoff. These pneumatically operated valves are ruggedly constructed and feature a unique UHMW* polymer diaphragm that isolates the wetted components from the actuator. The UHMW* sealing head provides long wear.

The 725DA-SS provides stroke adjustment for both fluid flow and snuff-back control. The 725D-SS version is nonadjustable and provides fixed stroke travel.

Features

- Positive shutoff
- End-of-cycle snuff-back
- Diaphragm life exceeds 50 million cycles
- Cycle rate exceeds 400/minute
- Excellent chemical resistance
- Low-maintenance design

“Machine downtime was reduced to almost zero, and braze paste usage reduced by 40%.”

Electronic pdf files of Nordson EFD manuals are also available at www.nordsonefd.com
The complete system includes the 725D Series valve, ValveMate™ 8000 controller, the fluid reservoir and dispense tip. Expert technical assistance and high quality standards ensure productive, trouble-free performance. Nordson EFD offers a full line of reliable dispensing systems to meet your specific application requirements.

**ValveMate 8000 Controller**
Valve open time is the primary control of deposit size. The ValveMate controller puts push-button adjustment of valve open time where it needs to be — at the valve.
- Multi-valve control - up to (4) valves
- Partner to Programmable Logic Controller (PLC)
- Easy deposit size control
- Increased production output
- End user convenience
- On-the-fly adjustability
- Maximum machine efficiency

**Automation: XYZ & XYZR Robot Dispensing Systems**
Nordson EFD offers a wide selection of XYZ and XYZR robot systems that are fully compatible with ValveMate valve controller systems. Consistent, accurate, repeatable and complex dispensing applications can be easily performed with Nordson EFD robots, with working envelopes that range from 200 x 200 x 50mm to 510 x 510 x 100mm. Scara robot systems are also available for larger, heavier products or inline dispensing applications.

**Fluid Reservoirs**
Nordson EFD reservoirs are supplied with precision, constant-bleed regulators to ensure consistent fluid pressure to the valve. Tank reservoirs are available in 1.0, 5.0 and 19.0 liter capacities. Optimum™ Retainer Systems and Cartridges are available from 2.5 to 32 ounces (75cc to 950cc).

**Dispense Tips**
Tip selection is critical to achieve optimum valve performance. 725D Series valves are packaged with an Ultra dispensing tip kit for maximum fluid control. The kit includes smooth-flow tapered tips in sizes from 14 to 25 gauge, precision stainless steel tips in sizes from 14 to 21 gauge, and tip caps.
For high flow rates, 1/4 NPT one-piece polyethylene nozzles are available.
