Precision 725HF valve systems dispense low to high viscosity fluids up to 450ml/second.

Best for filling small bottles, foil packs and samples with lotions, perfumes and adhesives. Also used for potting electronics and applying braze pastes.

Features
- FDA-compliant wetted parts
- Autoclavable wetted parts (121°C)
- Fully adjustable flow rates
- Positive cutoff
- Cycle rate exceeds 400/minute
- <±1% repeat fill tolerance
- Low-maintenance design
The complete system includes the 725HF dispense valve, ValveMate™ 8000 controller, the fluid reservoir and dispense nozzle. Expert technical assistance and high quality standards ensure productive, trouble-free performance. Nordson EFD offers a full line of reliable dispensing systems to meet your specific application requirements.

725HF Series Valves
The advanced 725HF design provides positive cutoff by means of a slight pull-back at the dispense cycle end, ensuring accurate fill amounts. Unique UHMW® polymer diaphragm replaces typical seals and seal maintenance, and ensures separation integrity of fluid from cylinder body.

725HF-SS
Size: 108.7 mm x 31.1 mm diameter (4.28" x 1.23")
Weight: 309 grams (10.9 oz)
Maximum fluid pressure: 100 psi (6.9 bar)
Actuating air pressure required: 70 psi (4.8 bar)
Fluid inlet thread: 1/4 NPT
Fluid outlet: 1/4 NPT
Mounting: (1) 5/16 UNF or adjustable mounting block
Air cylinder body: Hard-coated aluminum
Fluid body: Type 303 stainless steel or acetal copolymer
Piston: Hard-coated aluminum
Spring: Stainless steel
Sealing head/diaphragm: UHMW® polymer, FDA-approved

725HF-A
Size: 109.2 mm x 31.1 mm diameter (4.30" x 1.23")
Weight: 185 grams (6.5 oz)
Maximum fluid pressure: 100 psi (6.9 bar)
Actuating air pressure required: 70 psi (4.8 bar)
Fluid inlet thread: 1/4 NPT
Fluid outlet: 1/4 NPT
Mounting: (1) 5/16 UNF or adjustable mounting block
Air cylinder body: Hard-coated aluminum
Fluid body: Type 303 stainless steel or acetal copolymer
Piston: Hard-coated aluminum
Spring: Stainless steel
Sealing head/diaphragm: UHMW® polymer, FDA-approved

ValveMate 8000 Controller
Valve open time is the primary control of deposit size. The ValveMate controller puts push-button adjustment of valve open time where it needs to be — at the valve.
- Multi-valve control: up to (4) valves
- Partner to Programmable Logic Controller (PLC)
- Easy deposit size control
- Increased production output
- End user convenience
- Maximum machine efficiency

Automation: XYZ & XYZR Robot Dispensing Systems
Nordson EFD offers a wide selection of XYZ and XYZR robot systems that are fully compatible with ValveMate valve controller systems. Consistent, accurate, repeatable and complex dispensing applications can be easily performed with Nordson EFD robots, with working envelopes that range from 200 x 200 x 50mm to 510 x 510 x 100mm. Scara robot systems are also available for larger, heavier products or inline dispensing applications.

Fluid Reservoirs
Nordson EFD reservoirs are supplied with precision, constant-bleed regulators to ensure consistent fluid pressure to the valve. Tank reservoirs are available in 1.0, 5.0 and 19.0 liter capacities.

Dispense Tips
Tip selection is critical to achieve optimum valve performance. 725HF Series valves are packaged with (6) 14 gauge Ultra smooth-flow tapered tips and (2) 1/4 NPT one-piece polyethylene nozzles.
