R Series Automated Dispensing Systems
Instructions for Tip Alignment Kit (P/N 7362353) Installation

1. Position the alignment kit on the dispensing system.
2. Align the kit with the marks on the system.
3. Secure the kit in place with screws.
4. Ensure the kit is level and flush with the system surface.
5. Check the alignment by inserting a tip and observing the flow pattern.
6. Adjust the kit as necessary to achieve proper alignment.
7. Final check to ensure the alignment is correct.
