

Invest in Longer Pump Life....

Upgrade your Rhino[®] pump today with Nordson's patented wear-resistant ScoreGuard[®] Coating

Features of ScoreGuard Coating

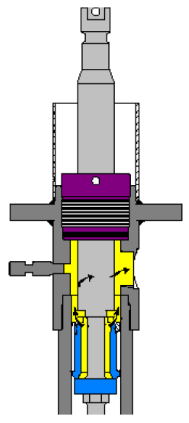

- Twice as hard as conventional hard chrome plating
- Superior durability when used with more abrasive and difficult to spray liquid materials
- Simple to retrofit existing pumps
- Excellent corrosion resistance

For superior performance and toughness when used in wear applications

Benefits of Upgrading to the Rhino XD2

- **ScoreGuard Coated Plunger Rods mean:**
 - Longer packing life
 - Longer plunger rod life
 - Fewer pump rebuilds
 - Improved performance
- Rebuildable packing gland cartridges
- Bolt-together pump design for easier maintenance

Contact your Nordson representative or call customer service for more information on how ScoreGuard coating will help you maximize your system's productivity.

Use Nordson P/N 1073703 to upgrade today!

For more information on how Nordson can help you achieve your production goals, contact us today at 440.985.4000 or visit us on-line at www.nordson.com/coldmaterials.

Chrome Plating vs. ScoreGuard Coating

Conventional hard chrome plating can mean

- microcracking
- high internal stresses
- surface imperfections

And limit its service life.

With Patented ScoreGuard Coating

- High hardness
- + low coefficient of friction
- + low residual stress levels of the coating

= resists abrasive wear and galling

For superior performance and toughness in wear applications.

Plunger Coating Comparison

Test results show the ScoreGuard coated plunger polished to mirror-like finish after 24x the cycles of conventional hard-chrome-plating.
