1. Material Data

Fluid (trade name, code design)

Viscosity Pas MFI IV

Filling material abrasive aggressive / corrosive

Melt density

2. Requested Valve Function

shut-off valve switching valve start-up valve diverter valve

others

Heating fluid electrical

Number material inlet channels material outlet channels

Channel diameter

Connection diameter

3. Line Configuration

> > >

4. Process Data

Throughput kg/h

Process pressure max. bar norm. bar

Process temperature max. °C norm. °C

5. Others
